

WHAT IS THIS BULLETIN?

The *Symposium Tribune* is a new initiative of the Local Host Team of the 40th International Symposium - *Emphasizing Energy Transition*, devised by the Local Host Chair, Tiziano Faravelli. The primary goal of this bulletin is to keep attendees informed of the main events happening at the Symposium and spread important innovations beyond the more restricted interactions within separate colloquia.

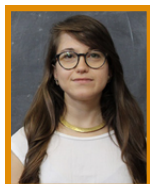

To this aim, we built a team of enthusiastic volunteers willing to summarize for you interesting scientific talks, debates and ideas. In the bulletin you will also find interviews with the speakers, organizers, and awardees, as well as opinions from the participants. Also, in case you will be missing any of the social events, you can read about them here too!

And don't worry- in case you are unsure about the schedule, we will remind you of the main events happening the following day so that you come prepared!

MEET THE TEAM!

Comments and feedback are welcome via the **40th ISOC Telegram!** (<https://t.me/CombustionSymposium2024/2>)

Luna Pratali Maffei
Assistant Professor
Politecnico di Milano

Fabiola Citrangolo Destro
PhD Student
